Union Made - Missouri Made Product Spotlight

Brought to you by your
UNION LABEL COMMITTEE

Dear Brothers & Sisters,

This month's product spotlight will be for our Brothers and Sisters who are cat owners. If you are like myself and own a cat we all know the worst part is the litter box. Did you know you can support fellow Missouri Union members by choosing to use Tidy Cats cat litter ?? Tidy Cats litter is a product of the Purina Pet Care line, with their headquarters located in St Louis, Missouri. Purina Pet Care prides itself with the fact that <u>99% of its pet products are produced in U.S. factories.</u> They also take pride in the fact that 35,000 quality checks are performed in these factories each day and 24% of the electricity used in the manufacturing process comes from renewable energy. The factory that produces Tidy Cats litter is located in Bloomfield, Missouri and employs approximately 225 members of International Association of Machinists and Aerospace Workers Local 1345. The 500,000 square foot factory was opened in 1976 and became a litter factory in 1995. Unique to the Bloomfield factory is the overhead bridge that allows full pallets of finished products to be conveyed to the nearby distribution center. The hard working members of IAM 1345 produce the traditional non-clumping litter sold in the bright yellow bags. They also produce the new Tidy Cats Lightweight litter, which is what I use, and Tidy Cats scooping clay litter.

So next time you need to purchase cat litter whether it's for your cat, to clean up a mess in the garage or get some extra traction on a snowy day, choose Tidy Cats and by doing so you will be supporting Union jobs & fellow Union Brothers & Sisters in the "Show Me" state.   You can go to www.tidycats.com/coupons to sign up for coupons and offers on Tidy Cats products.
